

CONTENTS

CHAPTER 1	
General introduction	7
CHAPTER 2	
Myosin heavy chain composition – relationship to the oxygen cost of incremental cycling in humans	17
CHAPTER 3	
Training-induced decrease in $\dot{V}O_2$ “excess” during incremental cycling – relationship to the MyHC composition, mitochondrial biogenesis, UCP3 and SERCA contents in the <i>vastus lateralis</i>	45
CHAPTER 4	
Training-induced changes in basal serum T_3 and T_4 concentrations – relationship to muscle protein changes and to the oxygen cost of cycling	77
CHAPTER 5	
Summary	95
Abbreviations list	99
Acknowledgements	101
